DETAILED ACTION

Election/Restrictions

1. This Non-Final Office Action is in response to Applicant's election with traverse of claims 11-19 in the reply filed on August 25, 2005 is acknowledged. The traversal is on the ground(s) that the details of a page should not make such utility separate. This is not found persuasive because a message including an identifier of a page is not in claim 1, which will cause an undue burden on the examiner. Thus, the requirement is still deemed proper because both inventions depend on different subclasses, and is therefore made **FINAL**.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 16 recites that the client being configured... It is unclear as to what the client is configured to do. Appropriate correction is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3623

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 11-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Whitmyer, Jr. "Whitmyer" (U.S. Patent No. 6,049,801) in view of Olapurath (U.S. Patent No. 6,678,714).

As per claims 11-13, Whitmyer discloses a website providing professional services. In so doing, Whitmyer discloses maintaining a record of information for determining the approach of task due dates for a plurality of client entities (i.e., a database for storing client information for providing services. Note col. 3, lines 51-58), sending an electronic message to a client entity for which a task due date falls within a succeeding predetermined period, said message including an identifier of a page obtainable from a hypermedia server (col. 7, lines 43-50), receiving and displaying said message at a client apparatus (col. 7 lines 59-62), performing a selection operation of said identifier in said displayed message and in response thereto, loading the identified page into a hypermedia browser of the client apparatus (col. 3 line 65 through col. 4 line 13), sending a hypermedia form page from said hypermedia server, said form page identifying the task whose due date triggered said message and having input means for accepting task performance instructions in respect of said task (col. 6, lines 25-54). Whitmyer does not explicitly disclose the concept accepting a task performance instruction in respect using said input means and submitting said instruction to said hypermedia server, receiving said instruction at the hypermedia server, and performing said task in response to a received instruction.

Olapurath discloses task management system which allows a web server to receive instructions for performing for a client (col. 4, lines 53-67). It would have been obvious to a person of ordinary skill in the art would have been motivated to modify the disclosures of Whitmyer to

Art Unit: 3623

incorporate the teachings of Olapurath in order to perform professional services desired by a client.

As per claim 14, Whitmyer further discloses wherein a login form page is identified by said identifier, said login form page including controls for the input of a username and a password, and said hypermedia form page is sent in response to submission of a valid username-password combination using said login form page (col. 5, lines 43 through col. 6 line 5).

As per claim 15, Whitmyer further discloses wherein said task is a payment of a renewal fee for an intellectual property (col. 7, lines 31-42).

Claims 16-19 are method claims corresponding to system claims 11-15, and are rejected under 35 U.S.C 103 for the same reason set forth in claims 16-19.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. RE38633 to Srinivasan, discloses an electronic network based project management server system.

b. Feinleib (U.S. Patent No. 6,272,532), discloses a system which sends electronic messages as reminders of critical dates.
